## Update And Vital Understanding

Over the last few months, there has been the sorrowful death of four amazing Bride brothers. First there was the murder of Ogeda. He was living with Caleb, and one night he heard commotion outside and went out to check on it. Men were stripping parts off of the Bride car and he proceeded to try to stop them. But, someone came up behind him, striking him on the head, and killing him.

In all honesty, I was quite agitated with the Father over this. That man was a precious and valuable gem. He was our mechanic, and had recently lost his wife and child during a birth, followed by the murder of his two children while away taking care of Caleb, and they also stole everything in his house. Now this precious servant was gone. And, this costly death was just a dreadful beginning!

Another precious servant was attorney Peter. He came from Nairobi to help with some Bride legal matters; but once there, he could not leave. On one occasion he got a ride on a motorbike to pick up some parts, and was struck by a truck, dying immediately. And all this did was further advance my troubled heart over the death of such faithful servants.

Then came wonderful Patel. His business was construction materials, and he began designing the exterior and interior of the home. And not only did he design it, but he himself purchased many of the materials. [Click here](#) to see his expertise; and all of the window coverings and netting were purchased by him. But, I did not know until the end that he was dealing with cancer, and when he completed the Bride house he traveled to India and died of COVID. Again, Yahweh took the precious—now the third!

And following him was engineer Daniel. He too came to give us his help, and like the others, once there could not stay away. And his timing was perfect, for now we were dealing with solar panels and a well pump and other such matters. And just recently they were hand-digging the trench for the waterline from the well to the water tower, and suddenly he collapsed. They rushed him to the hospital and put him on oxygen, but he died, supposedly from COVID. Daniel was now number four in this tragic string of priceless brothers who died!

So, what is going on with these four unmistakable testimonies? First, the number “four” speaks of fullness, of the nations, even the world. And most noteworthy, this is clearly the period of the first four one-thousand-year periods of man—that period marked by and concluding with the coming of Yahshua. He is the great marker of the end of that fateful period, followed by the two-thousand-year period of the church. So, mankind is clearly divided by a four-and-two pattern. Therefore, these first four wonderful men dying, speak of the loss of truly wonderful men and women who had to

come in that terrible death period. And that leads us to the culminating two one-thousand-year periods of the church—Christianity.

So, do they then defeat death and live? Unfortunately, no. They have had the kingdom. But even so, is it the kingdom we truly need? Not at all! We need the kingdom wherein Satan is defeated and there is no more death! And that great need is exactly what was evidenced in yet two more deaths at the highly prophetic Bride home.

On July 4, several brothers began the tedious task of uprighting the tower which will hold the water tank. [Click here](#) and you can see a video of this tedious process. Also, at 46 seconds you can briefly see the large tank that is to be placed on the tower.

So, thus far with these four deaths evidencing the four thousand years of man where all men died, what have we seen evidenced concerning the last two thousand years? Has kingdom man continued to die? Unfortunately, yes. This being the case, would possibly two more men die at the Bride property? Again, unfortunately yes. At the completion of that video, two youth of sixteen and fourteen suddenly could not breath and died on the way to the hospital! And with the two succumbing to death at the same time, this clearly evidenced the reality of what we are seeing attested here. And, what were they erecting? A tower that reached into the heavens. This clearly attested to the two thousand years of Mystery Babylon Christianity.

But what do we need after these last two thousand years? We need the outpouring of the Holy Spirit, the latter-rain water that is from on high. And after we get the tower stable and lay the waterlines, we will add the tank that will give us that water which amazingly gushed out of the ground in Gihon fashion—“bursting forth!” Such will be the testimony of the water tank when it is added. And most importantly, we need the true fulfillment. Oh the wonder of Yahweh!

Come quickly, Immanuel!
